The versatile DC Regulated Power Supply is an easy to use, DC voltage source. The multitude of Operation modes, functional layout of panel, consistent with quality construction and performance makes it ideal for training and education also.

The supply provides a maximum of 500 DC volts.

The output DC voltage and current can be read on 3 > z-digit digital panel meter.

The power supply's output is floating i.e.; either the positive or negative output is connected to the chassis or ground

The Power Supply is a highly engineered instrument. The entire circuit is laid on high quality printed circuit board, which is epoxy masked and component numbers are printed on it, for easy maintenance and servicing.

Indication of DC Voltage/Current

3 / 4 digital LED panel meter

Output DC Voltage

Max. rated DC load current

Accuracy of DPM (DC volts)

Accuracy of DPM (DC amps)
