## OUR PRODUCT RANGE

**Temperature Instruments**

**Counters**

**Timers**

**DPMs**

**Load Instruments**

**Humidity Instruments**

**pH Instruments**

**Sensors**

**Display Systems**

**Transmitters**

**Power Supplies**

**Miscellaneous**

**Digital Conductivity Meters**

**Digital RPM Indicators**

**Thermocouples**

**Customized Controllers**

**Testing Instruments**

**Variable Transformers**

**Software Solutions**

**Customized Solutions**

## Software Solutions

**Nutronic India** provide a broad range of services including Application and Systems level Programming on C/C++/VC++/VB/.net /Java /pHP/ASP Technologies.

We perceive technology with high spirit. Technology in mind and the enthusiasm in heart is what we mean by us.

**Nutronic India** is supported by state of the art infrastructure and highly skilled technical professionals, with a clear intention to emerge as the best and achieve our corporate vision: Customer Focus ...with Passion for Excellence

### WHY

#### Expertise

All of our team members have expertise in developing customized, fully integrated systems in a variety of industrial standards. Some of our team members have worked on software projects for industry leading firms. In addition, Softlogic's & Developments has a well-managed administrative support staff to assist in meeting your needs.

#### Technically Advanced

Our software development tools and products implement Object-Oriented design and programming. Further, we use the most modern development tools and technologies available on the market today. We are staying on pace with the fast evolving software development capabilities and uses of multimedia and the Internet.

#### Flexibility

We are custom-build to client specific requirements. We have proven to be able to react quickly and to adjust to any changes or additions thrown at us during the course of a project.

#### Speed

Because of our experience, the tools we have evolved, and our talented programmers (among other reasons) we can develop quality, customized systems very quickly.

#### Dedication

Our programmers are professionals in the truest sense of the word. When we have your deadlines to meet we ensure the deadline is met. When you have a last minute change in specifications, we don't turn the lights off at five and go home. Our people put in whatever work is required, whenever needed, to keep our clients happy.

#### Reasonable cost

India has low operating costs, yet India is a world technological superpower with a long tradition of investment in science and engineering. With a rich pool of technical talent and low-cost environment for operating, overhead and salaries. Therefore, we can pass on significant savings to you. Ultimately, you'll get more for your software budget.

## QUALITY PROCESS

Quality is an ever-extending goal - the better you are, the better you need to be. The management of the quality process is infinite, and marked only by milestones, never by completion! **Nutronic India** recognizes that, to fulfill our goal of self-evident quality, we need to constantly improve our deliverables to match the increasing expectations of our customers. With standardization being the key to all growth - professional, personal and financial. **Nutronic India** reviews all its processes periodically and enhances them regularly.

We implement the Software Quality Assurance (SQA) that addresses the quality assurance needs at every phase of the development cycle. Our aim is to provide quantifiable and consistent results through automated processes that have been tested over time.

### DEVELOPMENT METHODOLOGY

The software methodology encompassed by us is based on the iterative incremental model. This model is the one in which the software system will be divided into number of portions, each of which will undergo the phases of the software lifecycle. The use of incremental development allows the project to deliver core functionality early in the project, prioritized on the basis of functionality required by the client. Iterative development permits developer to refine requirements with the client over a number of iterations with the use of prototypes.
